Resource person	Dr. T. D.VIMALA,Hon.Professor,Department of Psychology
No. of. Students attended	150
Skills achieved	The consequences of cyberbullying can be severe and long-lasting, affecting various aspects of a victim's mental health
Values achieved	The results further highlighted that although cyber victimization and perpetration and traditional bullying victimization and perpetration positively correlated with anxiety, depression, lower self-esteem, suicidal ideation, absenteeism and leaving school early, victimization in both types of bullying.

Detailed report of the Activity :

The committee of **ABUSE OF THE SOCIAL MEDIA AND CYBERBULLYING** of Sri A.S.N.M. Govt. College(A),Palakol . had conducted webinar on **Mental Health of Cyberbullying and Social media abuse”** on 26/11/24 . The chief guest of the program Dr. T. Raja Rajeswari, the principal of the college said that, “Cyberbullying not only damages mental health but also undermines the safe spaces we need to foster meaningful online interactions.” The resource person of this webinar Dr.T.D.VIMALA,Hon.Professor,ANU advised the students "Never share your personal information or photos with strangers online, and always tell a trusted adult if someone is being mean or scary to you on the internet." The rise of **cyberbullying** and **social media abuse** has become a significant concern for individuals, families, and communities worldwide, especially with the increasing prevalence of social media platforms. The psychological and emotional toll of being targeted online can be severe, particularly for young people, but it also affects adults. The consequences of **cyberbullying** and **social media abuse** extend beyond the immediate distress and can have long-lasting effects on a person's mental health and well-being. Always be respectful and friendly to others on social media, and report any bullying or hurtful behavior to a grown-up or the platform's moderators.

In this program, IQAC Coordinator Sri.K. Bhadrachalam, NSS PO's Dr.M. Ramakrishna,**SOCIAL MEDIA AND CYBERBULLYING** Coordinator Ch.Ravi Kumar, Staff and students participated.

Out come of this Activity: Cyberbullying and **social media abuse** have significant and lasting effects on mental health, contributing to **depression, anxiety, low self-esteem**, and even

suicidal thoughts. These forms of abuse can affect individuals of all ages, with young people being particularly vulnerable. The anonymity of the internet and the pervasive nature of online harassment create a toxic environment that can worsen mental health issues.
