i CAMPUS

Scheduled backups to both local and remote server

Secured login using Biometric authentication and security keys

DBS iCampus is One-stop-destination for examination, preparation, results, reports and more. Specially designed examination tool to solve all your preparation worries. The platform is smooth to use with a translational flow of information.

The education system is witnessing unparalleled growth with technology. The new technology module came into existence with a revolutionary change in the pattern and arrangements of exam system reducing time and manual efforts. As the conduction of exam process is also different for all institutions, ensuring the best software embedded with awesome features will support in overall examination process. The primary functionality of i campus is to manage student exam data efficiently. Maintain security in exams with automated processes. Traditional examination and result computation system involve huge volumes of answer-paper scripts that become difficult to manage and are vulnerable to risks that include damaged and misplaced answer scripts. The result system also requires manual sorting, evaluation and safeguarding, which contributes to the risk of errors and biases, security concerns and may ultimately cause delays in announcing the results.

The solution lies in switching over to a digital and automated student result processing system from the current manual result processing system.

DBS iCampus facilitates you to create results in a diligent manner from planning and preparing to evaluating and results by keeping in mind the widespread education system.

DBS iCampus result processing system speeds up the whole process, helping deliver results quickly. Thus, streamlines the entire process benefitting all stakeholders.
