

SRI A.S.N.M.GOVERNMENT COLLEGE (A), PALAKOL W.G.DT A.P

College News Letter for the Month of July 2024

VISION OF THE COLLEGE

To be the premier institution by imparting holistic education to ignite the inquisitive minds, apprehending the nuance in research, nurturing sustainable educational environment, instilling the skill based learning towards global competency in creating self-reliant citizens with moral values and social responsibilities.

AT A GLANCE

S.No	DATE	NAME OF THE ACTIVITY	Page No
1	7/4/2024	birth Anniversary of Alluri Sitharama Raju	3
2	7/11/2024	World population day	5
3	7/28/2024	World Nature Conservation Day	7
4	7/29/2024	International Tigers Day	9
5	7/30/2024	Helmet wearing -Awareness Rally	11
6	7/30/2024	Elocution Competition on Catch the Rain	13

Report on Alluri Sitarama Raju: The Revolutionary Leader of the Rampa Rebellion:-

Alluri Sitarama Raju, a legendary freedom fighter and revolutionary, is remembered for his courageous struggle against British colonial rule in India. Known for his fierce commitment to justice and freedom, Alluri Sitarama Raju led a guerrilla campaign in the Eastern Ghats region, uniting and mobilizing the tribal communities of Rampa against the oppressive forest policies enforced by the British government.

Born in 1897, Alluri Sitarama Raju grew up witnessing the exploitation and suffering of India's tribal people under colonial rule. He was deeply moved by their plight, especially due to the oppressive forest laws that restricted their traditional rights to their lands and livelihoods. These policies prohibited the tribal communities from freely gathering forest produce, practicing shifting cultivation, and accessing the resources they depended upon. These harsh restrictions caused widespread resentment and despair among the tribal population.

Alluri Sitarama Raju, fueled by a strong sense of justice, organized and led the Rampa Rebellion (1922–1924) to resist these colonial impositions. Through his inspirational leadership, he encouraged the tribal people to resist the British authorities and reclaim their rights. Utilizing guerrilla warfare tactics, Raju and his followers launched strategic attacks on British outposts, police stations, and government offices in the Eastern Ghats, particularly in the Godavari region. His deep knowledge of the terrain and his connections with local communities enabled him to evade capture and keep the British forces on edge for nearly two years.

Despite limited resources, Raju's movement gained significant momentum, capturing the attention of the British authorities, who considered him a formidable threat. Known for his bravery and dedication, he became a symbol of resistance against British oppression and an inspiration to Indians across the country. Unfortunately, the rebellion was eventually suppressed, and Alluri Sitarama Raju was captured and executed by the British in 1924. However, his legacy

endures as a symbol of resilience, bravery, and patriotism.

Today, Alluri Sitarama Raju is remembered as one of India's great revolutionary heroes, celebrated for his unwavering commitment to the freedom and dignity of his people. His life and sacrifices continue to inspire generations, reminding us of the power of unity, courage, and determination in the face of injustice.

Department of Economics & Department of Statistics

11-07-2024

Report on World Population Day Observance by the Department of Economics & Statistics:-

The Department of Economics & Department of Statistics jointly organised “World Population Day”, an event dedicated to raising awareness of population dynamics and their far-reaching impact on sustainable development. The program emphasized the crucial role of statistical data in understanding and addressing population-related challenges. Through presentations and discussions, the department aimed to enhance participants’ understanding of demographic trends and their implications for the future.

World Population Day, observed annually on July 11, was established by the United Nations to draw attention to urgent population issues and promote solutions for a balanced and sustainable world. This year, the Department of Statistics focused on educating students and the college community about the effects of rapid population growth on resources, health, and economic stability. By examining these issues through a statistical lens, the department underscored the importance of reliable data in crafting policies and making informed decisions.

In his opening remarks, the Head of the Department of Statistics highlighted how population dynamics—such as birth rates, mortality rates, and migration patterns—affect key areas of development, including education, employment, healthcare, and the environment. Statistical data, he explained, is essential for government agencies, NGOs, and researchers working to address population issues effectively and develop targeted solutions.

The event included informative presentations on current global population trends, emphasizing regions experiencing rapid population growth and the unique challenges they face. Students and faculty discussed topics such as resource scarcity, urbanization, aging populations, and their collective impact on society. The department also provided insights into how statistical

analysis helps policymakers project future population scenarios and plan accordingly to address potential issues in areas such as healthcare, housing, and employment.

A special session was held to demonstrate data-gathering methods and analytical tools used in population studies, giving students hands-on exposure to practical applications in the field of statistics. Participants learned about data interpretation, statistical modeling, and the role of technology in population studies, further illustrating the power of data-driven insights in tackling complex global challenges.

The observance of World Population Day by the Department of Statistics reinforced the critical role of statistical data in understanding population dynamics and shaping sustainable development policies. The event succeeded in fostering a deeper appreciation for statistics among participants, inspiring them to think critically about population issues and the valuable contribution of data in creating a balanced and equitable future.

Report on World Nature Conservation Day Observance

On July 28th, Sri A.S.N.M. Government College observed *World Nature Conservation Day*, a day dedicated to raising awareness about the critical importance of preserving natural resources and fostering a sustainable environment for future generations. This global observance serves as a powerful reminder of our collective responsibility to protect Earth's biodiversity, reduce human impact on ecosystems, and promote the sustainable use of resources.

World Nature Conservation Day highlights the urgent need for action in safeguarding the planet's natural beauty and resources. This year, the program at Sri A.S.N.M. Government College focused on engaging students and staff in meaningful discussions and activities related to conservation. Presentations and workshops emphasized the interdependence between human well-being and a healthy environment, stressing that our actions today will significantly impact future generations.

Speakers at the event shared insights on various aspects of nature conservation, including the need to protect wildlife and their habitats, reduce pollution, and implement practices that minimize ecological footprints. They underscored the fact that human activities—such as deforestation, industrial pollution, and unsustainable agriculture—are contributing to biodiversity loss and climate change. These actions threaten not only wildlife but also human populations by disrupting ecosystems that provide essential resources and services.

Through interactive sessions, students were encouraged to consider how they can contribute to conservation efforts on an individual level. Practical suggestions included reducing waste, conserving water and energy, and adopting eco-friendly practices in daily life. The event also featured a screening of short documentaries on successful conservation initiatives around the world, showcasing how communities and governments are working together to protect the environment.

Participants were also invited to take part in a pledge to commit to sustainable living practices and promote conservation in their communities. By uniting individuals, communities, and policymakers

in a shared commitment to the planet, World Nature Conservation Day serves as a catalyst for meaningful environmental action.

The observance of World Nature Conservation Day at Sri A.S.N.M. Government College inspired participants to recognize their role in environmental conservation. The program concluded with a call for ongoing action, encouraging students, faculty, and staff to be mindful stewards of nature and to actively contribute to building a sustainable future. Through education and awareness, the college aims to instill in students a sense of environmental responsibility that will guide them throughout their lives.

Department of Zoology

29-07-2024

Report on International Tiger Day Celebrations by the Department of Zoology:

In July 29, 2024, the Department of Zoology at Sri A.S.N.M. Government College observed *International Tiger Day*, a day dedicated to raising awareness about the conservation of tigers and their habitats. The event highlighted the urgent need to protect these majestic animals, which are on the brink of extinction due to habitat loss, poaching, and declining prey. Students, faculty, and staff participated in this program, which aimed to educate and inspire a commitment to wildlife conservation.

The program commenced with an address by the Chief Guest, the Vice Principal of the college, Sri T. Krishna. He discussed the importance of tigers as a keystone species and explained their critical role in maintaining ecological balance. Sri T. Krishna introduced the students to *Project Tiger*, a conservation initiative by the Indian government focused on protecting and increasing the tiger population. He outlined the project's main objectives, including habitat protection, anti-poaching measures, and awareness campaigns to engage local communities in tiger conservation efforts.

Sri T. Krishna also shared statistics indicating a decline in the global tiger population, emphasizing the need for collective efforts to prevent these animals from vanishing. He encouraged students to become advocates for tiger conservation, stressing that the loss of tigers would have far-reaching consequences on biodiversity and ecosystems.

Sri G.D. Srinivasa Rao, Lecturer in English, also spoke at the event, emphasizing the role of zoological parks in wildlife conservation. He explained how zoological parks and sanctuaries serve as safe havens for endangered species, including tigers, and provide opportunities for breeding programs, public education, and research. Mr. Srinivasa Rao highlighted the importance of preserving natural habitats and reducing human encroachment into wilderness areas to protect wildlife.

The event also saw active participation from V. Sirisha, Lecturer in Botany, and P. Jyotsna Sri, Lecturer in Zoology, who both encouraged students to explore the role of conservation biology

and support efforts to protect endangered species. Students engaged in discussions about the threats faced by tigers and explored ways they could contribute to conservation, from spreading awareness to reducing environmental impacts.

International Tiger Day celebrations at Sri A.S.N.M. Government College fostered a sense of responsibility and awareness among students regarding wildlife conservation. By spotlighting the importance of tigers and the threats they face, the program inspired participants to take proactive steps to support conservation efforts and ensure a future where tigers continue to thrive in the wild.

Report on Helmet Safety Awareness Rally:-

Sri A.S.N.M. Government College recently organized a *Helmet Safety Awareness Rally*, aimed at raising awareness about the vital importance of helmet use for personal safety among students and the broader community. This initiative was part of the college's commitment to promoting responsible behavior and road safety among young people and the general public.

The rally highlighted the life-saving benefits of wearing helmets while riding two-wheelers, underscoring that helmets are essential for reducing the risk of head injuries in case of accidents. Participants, including students, faculty, and volunteers, marched with banners and placards carrying messages such as "Helmets Save Lives" and "Safety First." Through these slogans, they conveyed the crucial role helmets play in protecting against serious injury or even death.

Addressing the rally participants, a representative from the college's administration stressed the importance of wearing helmets as a simple yet effective measure for safeguarding lives. He pointed out that while road accidents are common, the use of helmets can significantly lower the risk of fatal injuries and reduce the burden on healthcare systems. He also emphasized the need to make helmet-wearing a consistent habit rather than a mere compliance with traffic laws.

The rally gained attention from onlookers and encouraged many to consider the benefits of helmet safety. By engaging both the students and the public, the event succeeded in creating awareness about responsible riding practices and underscored the college's dedication to promoting community well-being.

The *Helmet Safety Awareness Rally* at Sri A.S.N.M. Government College not only emphasized helmet safety but also inspired students to adopt safe practices and set a positive

example within their communities. Through such events, the college hopes to reduce accident-related injuries and foster a culture of safety that protects lives on the road.

DEPARTMENT OF MATHEMATICS

30-07-2024

Report on Elocution Competition on "Catch the Rain" Organized by the Department of Mathematics:-

On July 30, 2024, the Department of Mathematics at Sri A.S.N.M. Government College (Autonomous), Palakol, conducted an Elocution Competition on the theme "Catch the Rain" as part of the Jal Shakti Abhiyan* initiative. This program aimed to raise awareness about water conservation and the importance of rainwater harvesting in addressing water scarcity. The event was held in Room No. 30 and was attended by students and faculty members, who actively participated in promoting water conservation practices.

The event began with a Catch the Rain Pledge, where all participants and attendees took an oath to support rainwater harvesting and adopt practices to conserve water. This pledge reinforced the message of the importance of sustainable water management and the need for collective efforts to ensure water availability for future generations.

The Principal of the college, Dr. T. Raja Rajeswari, graced the occasion with her presence and delivered a powerful speech on the Catch the Rain campaign. She emphasized the significance of rainwater harvesting and how it can help recharge groundwater levels, alleviate water shortages, and contribute to a sustainable environment. Dr. Raja Rajeswari urged the students to take an active role in promoting water conservation not only within the college campus but also in their local communities.

Following the principal's address, the elocution competition took place, with enthusiastic students expressing their views on water conservation and the *Catch the Rain* campaign. The participants highlighted various methods to improve water levels, including the construction of rainwater harvesting pits and the adoption of water-efficient practices in the college campus. Their speeches reflected innovative ideas on how water resources can be better managed and conserved, stressing the importance of collective responsibility in ensuring sustainable water use.

Through this initiative, the Department of Mathematics contributed significantly to the *Jal Shakti Abhiyan* and underscored the role of students in leading the change for a water-secure future. The event served as an important reminder that small steps, such as rainwater harvesting, can make a significant impact on preserving water resources for the generations to come.
