Department of Chemistry

16-09-2023

On September 16, 2023, Sri ASNM GDC(A), Palakol, celebrated **World Ozone Day**, an event organized by the **Department of Chemistry** at the **Mandal level**. Led by **Dr. T. Raja Rajeswari**, the event aimed to **raise awareness about ozone layer depletion, promote sustainable practices, and educate students on pressing environmental issues**. With an impressive participation of **142 students**, the program served as a platform to discuss the importance of environmental conservation and the role individuals can play in safeguarding the planet.

The primary objective of the celebration was to enhance **environmental awareness** among students by educating them on the causes, consequences, and preventive measures related to ozone layer depletion. Through presentations and discussions, participants gained **scientific knowledge** about the role of the ozone layer in protecting life on Earth from harmful ultraviolet (UV) radiation and the impact of human activities, such as the use of chlorofluorocarbons (CFCs), on its depletion. **Critical thinking** was encouraged as students analyzed real-world environmental challenges and explored innovative solutions to mitigate ozone layer damage.

A significant aspect of the event was its emphasis on **ethical and moral values** concerning environmental conservation. Students were inspired to adopt sustainable practices in their daily lives, such as reducing plastic consumption, conserving energy, and using eco-friendly products. The event fostered a sense of **ethical responsibility**, urging individuals to recognize their role in protecting the environment for future generations.

The celebration also promoted **inclusivity**, highlighting the importance of collective efforts in addressing environmental issues. Students engaged in group discussions, debates, and awareness campaigns, reinforcing the idea that environmental conservation requires cooperation across communities, industries, and governments. The concept of **sustainability** was a key focus, as participants learned about long-term strategies to protect the ozone layer, such as promoting green technologies and supporting policies that reduce pollution.

Furthermore, the event instilled the value of **environmental stewardship**, encouraging students to become proactive in advocating for eco-friendly initiatives and spreading awareness about the significance of ozone protection. By engaging in activities such as poster presentations, quizzes, and tree-planting initiatives, students developed a practical understanding of environmental conservation and its direct impact on human health and biodiversity.

Overall, the **World Ozone Day celebration at Sri ASNM GDC(A), Palakol**, was a **highly successful and impactful initiative**. It not only **educated students on environmental issues** but also **inspired them to take action towards sustainability and responsible living**. By fostering a sense of **scientific curiosity, ethical commitment, and environmental responsibility**, the event played a crucial role in shaping students into **future environmental advocates** dedicated to preserving the planet for generations to come.

Poster presentation

Department of Political Science

21-09-2023

On September 21, 2023, Sri ASNM GDC(A), Palakol, celebrated the International Day of Peace, an event organized by the Department of Political Science at the college level. The celebration, led by the Principal, aimed to integrate peace education into the curriculum, allowing students to gain a deeper understanding of global issues, foster empathy, and develop the necessary skills to become active promoters of peace in their communities and beyond. A total of 36 students participated in this meaningful event, which focused on both skill development and value-based learning.

The program highlighted essential skills that students could achieve through their engagement in peace-related activities. One of the primary skills emphasized was **conflict resolution**, where students learned and practiced strategies to address disputes effectively in personal and professional settings. **Communication skills** were also enhanced as students engaged in discussions, debates, and dialogues on peace-related issues, improving their articulation, active listening, and ability to express ideas clearly.

The celebration encouraged **critical thinking**, as participants explored complex global peace issues, analyzed them objectively, and made informed decisions. Additionally, the event fostered **empathy**, enabling students to understand the struggles of individuals in conflict zones and recognize the importance of emotional support and solidarity. Through interactions with individuals from diverse backgrounds, the event also promoted **cross-cultural competence**, allowing students to appreciate different cultures and perspectives.

Furthermore, the students developed **leadership skills** by organizing and coordinating peace-related activities, which involved teamwork, planning, and execution. **Artistic expression** played a significant role, with activities such as painting, poetry, and music encouraging creative forms of communication. **Community engagement** was another key aspect, as students participated in initiatives promoting peacebuilding, social responsibility, and teamwork. The event also raised **global awareness**, instilling in students a sense of global citizenship and a broader understanding of world affairs.

Beyond skill-building, the event instilled valuable principles and ethics. **Peace** was at the heart of the celebration, reinforcing the importance of non-violence, harmony, and conflict resolution. **Tolerance** was emphasized, as students learned to respect and appreciate cultural and ideological differences, fostering an inclusive mindset. **Compassion** was nurtured by encouraging students to support those affected by violence and injustice, further strengthening their humanitarian values.

Department of Chemistry

25-09-2023

The event titled "Career Opportunities in Chemistry" at Sri ASNM Government Degree College (A), Palakol, held on 9/25/2023, was organized by the Department of Chemistry with the aim of expanding students' awareness regarding the various career paths that a degree in chemistry can offer. Traditionally, chemistry graduates have pursued careers in research and teaching, but this event sought to emphasize the wide range of opportunities available in other sectors. It aimed to provide insights into industries and fields that highly value chemistry graduates, helping students understand the importance of early career preparation. Dr. G. Srinivasulu, the event's organizer, focused on equipping the students with essential career-building skills, such as career planning, networking, gathering valuable information about potential career options, and resume building. The session emphasized personal traits like ambition, adaptability, inquisitiveness, and passion as key elements for success in chemistry-related careers. By showcasing these diverse possibilities, the event encouraged students to consider broader career paths and make more informed decisions about their futures. With a turnout of 67 students, the event was well-received, providing a significant platform for students to gain guidance and motivation in their career journey.
